

SPEEDCAST AND SKYLOGIC ITALIA CONCLUDE ROAMING AGREEMENT TO EXTEND BROADBAND CONNECTIVITY AT SEA

Singapore, March 23, 2006

SpeedCast, a leading satellite service provider in Asia, and Skylogic Italia, the broadband affiliate of Eutelsat, Europe's leading satellite operator, today announced a new roaming agreement which will extend broadband maritime services around the world. This partnership between SpeedCast and Skylogic Italia will allow ships to remain connected anywhere in Caribbean, European, African, Middle Eastern and Asian waters, as well in the north rim of the Pacific Ocean and the west coast of Canada and the US.

Visitors to SpeedCast's booth at the Asia Pacific Maritime exhibition in Singapore from March 22nd to 24th will be able to learn more about this global service that offers real broadband speed (Mbps, not Kbps !) with unlimited usage for a monthly fixed service fee.

Combining the most reliable satellite technologies and a small dish (1-1.2m), this service will benefit a single boat or a fleet of vessels, providing them with a high-speed link particularly suited for Internet-based applications, network interconnection, Intranet, videoconferencing and Voice over IP.

"SpeedCast and Skylogic Italia are operating precisely the same VSAT technologies and have very complementary satellite coverage. It makes a lot of sense to work together and I am very happy to launch this roaming agreement that can really change the way ships communicate: they can now enjoy throughout a large part of the globe, high speed communications and unlimited usage for a fixed monthly fee." said Pierre-Jean Beylier, Chief Executive Officer of SpeedCast Limited.

"Skylogic Italia is delighted to team up with SpeedCast to extend broadband connectivity at sea", said Arduino Patacchini, CEO of Skylogic Italia. "Fleets and individual boat-

owners now have a competitive and efficient solution for a full suite of maritime broadband services. This new roaming agreement with SpeedCast marks an important step in the advance of maritime broadband solutions proposed by Skylogic Italia and operated through Eutelsat's extensive satellite coverage."

About SpeedCast

SpeedCast is a leading satellite service provider operating in over 35 countries in Asia Pacific, Middle East and Africa. SpeedCast's powerful satellite IP-based platform delivers:

- SpeedCast Broadband: High speed Internet connectivity for enterprises and service providers
- SpeedCast Private Network: Satellite network infrastructure and managed solutions
- SpeedCast Multimedia: Premium bouquet of over 30 world-class channels for broadband and mobile operators
- SpeedCast Broadcast: Global content delivery solutions to ensure high-quality distribution of enterprise and media content.

Operating on many different satellites in both C-band and Ku-band, SpeedCast and its 80 partners worldwide provide first-class services and 24/7 technical support.

About Skylogic Italia

Based in Turin, north-west Italy, Skylogic Italia operates one of the world's leading satellite broadband IP platforms. Its operational centre is equipped to offer a complete range of broadband services including content distribution, IP videostreaming, business TV, maritime applications, teleconferencing, remote control of installations, telemedicine, e-learning and Voice over IP. The teleport is connected by fibre to the Internet exchange point in Turin and uses capacity on satellites in Eutelsat's fleet in order to serve users in Europe, Asia, the Americas and Africa. Skylogic Italia's customers include small and medium-sized businesses, multinationals, government agencies and aid organisations.
